Förvaltat fonden sedan 08. november 2022

Investeringsstrategi

SKAGEN Vekst investerar i bolag som är lågt värderade i förhållande till både lönsamhet och tillväxt. Fonden investerar primärt i Norden, och sekundärt i resten av världen. SKAGEN Vekst passar för investerare som har en investeringshorisont på minst fem år. Det tecknas i fondandelar och inte direkt i aktier eller andra värdepapper. Fondens jämförelseindex speglar investeringsmandatet, men eftersom fonden är aktivt förvaltad kommer portföljen att avvika från indexets sammansättning. Från 1 jan 2014 ändrades fondens investeringsmandat från att investera minst 50% av kapitalet i Norge, till att investera minst 50% av kapitalet i de nordiska länderna. Det innebär att avkastningen före ändringen uppnåddes under andra förutsättningar än i dag.

Q1 commentary, March 2025

Global stock markets faced a challenging month as the Trump administration pressed for higher tariffs against America's largest trading partners. This fuelled concerns about rising inflation and slower economic growth, leading market participants to adjust their expectations. As we have highlighted in previous months, the US market had not anticipated any major risks, making it particularly vulnerable to the shift in outlook. European stocks fared better, supported by lower valuations and the prospect of increased defence spending. SKAGEN Vekst was not immune to the sell-off but outperformed the benchmark, largely due to its lower exposure to the US. Despite a strong start to the year, the weak performance in March resulted in a negative return for SKAGEN Vekst in the first quarter. However, thanks to its reduced US weighting and strong performances from Alibaba, Nordea, and Telenor, the fund outpaced the benchmark during the first three months of 2025.

The largest positive contributor to the fund's absolute return in March was Brazilian financial market infrastructure company B3. Its strong performance was driven by two key factors. First, the company received a favourable ruling in a tax dispute concerning goodwill amortization. While the ruling will not impact its financials, the market had been concerned about the issue, which led to a significant uptick in the stock price. Second, B3 reported solid trading figures for February, with equity volumes rising 12% from January. We used the spike in the share price following the tax ruling to slightly reduce our position. Hong Kong-listed conglomerate CK Hutchison Holding also had a strong month after announcing an in-principle agreement to sell its ports assets to a consortium led by BlackRock. However, we began to see concerning signals from China, where political leadership expressed disappointment that the company had not consulted Beijing prior to the deal. Later in the month, China's State Administration for Market Regulation launched an investigation into potential violations of anti-monopoly laws, which effectively stalled the deal. Despite this setback, the stock continued to perform strongly in March. We believe this

was due to the market being reminded of the significant discount at which the stock is currently priced relative to its underlying value. We find it hard to justify a 50%+ discount, given the company's track record of making value-accretive deals. Another strong performer in March was Telenor. The stock has been robust throughout the year and delivered solid results in February. However, we believe the recent strong performance was partly driven by a flight to safety amid market turmoil, so we took the opportunity to reduce our position.

The Danish pharma giant Novo Nordisk was the largest detractor to the fund's absolute return in March. The main issue was the continued lack of a rebound in prescriptions in the crucial US market, despite the company's efforts to make additional starter dose supplies available. While this has been a negative surprise for us, we still see a very favourable risk-return profile for the stock at current levels. We anticipate progress in limiting the supply of compounded versions of Novo's weight loss medication in the US. Furthermore, we believe the market is underestimating the immense opportunity Novo has outside the US – a region they have not aggressively targeted so far due to supply constraints. The company is also set to launch an oral version of their popular weight loss treatment in early 2026, which should drive further growth. Lastly, by late 2025, we expect the first Phase III study for semaglutide in Alzheimer's disease, which could unlock a significant new market opportunity for Novo. US bank Citigroup also faced challenges last month, as recession fears in the US have negatively impacted the banking sector. However, it's important to note that we expect Citigroup to be more resilient in a potential downturn compared to the past, given that the bank has significantly reduced its balance sheet risk. Citigroup is also in a much stronger financial position, holding ample regulatory capital. As a result, we continue to see attractive upside potential in the stock, especially now that the bank has aggressively begun buying back its own shares at a significant discount to book value. After a strong February, driven by solid results, Boliden experienced a setback in March. While metals prices rose slightly, the weaker US dollar hurt earnings expectations in local currencies, and general macroeconomic uncertainty likely contributed to the stock's weakness. In March, we participated in Boliden's capital markets day in Bergen and Odda, where we spent a couple of days with management and toured the new, modern facilities at the Odda zinc smelter. Our impression was that participants were generally very satisfied with the event, and we believe all attendees left with a stronger conviction in the attractiveness of Boliden's existing asset portfolio.

We took advantage of the recent pullback in the consumer discretionary space and initiated a small position in Hugo Boss during March. After a couple of years at the helm, the management team of Hugo Boss has shown good progress on its plan to reposition and revitalize the brand. With the focus now moving to margin improvements we see solid cash flow potential going forward, combined with a management team with willingness to return this to shareholders through dividends and share buybacks. Given the uncertain consumer backdrop, we take a cautious approach when sizing the position, but we are reassured by the company's relatively stable operating history. We continued to build our position in the Swedish industrial company SKF and the Mexican retailer Wal-Mex. We used the strength in the insurance sector to reduce our position in AIG, and we also exited Chubb as the stock reached our target price.

Over the past 12 months, we have reduced our exposure to the US stock market, which we view as overvalued relative to both global markets and its own historical norms. Within the US, growth stocks, in particular, appear priced at levels that have historically resulted in poor future returns. In contrast, many markets outside the US are trading near historical averages, presenting compelling opportunities. We are particularly optimistic about China and Korea, where depressed valuations stand in stark contrast to the potential for positive change. On a sector level, we have reduced our exposure to IT over the past year. While AI presents a remarkable opportunity, this is increasingly reflected in inflated share prices. The strong growth in the sector has largely been driven by a fear among major IT players of losing their competitive edge. This sustained capital investment will eventually need to deliver tangible economic benefits to justify current valuations. Additionally, we see rising risks of the market questioning the key investment merit of dominant IT companies – low capital-intensive earnings growth. We continue to favour attractively valued companies in the financial, industrial, and energy sectors, which remain resilient in an environment where inflation does not revert to post-pandemic lows. From a macroeconomic perspective, we believe the market underestimates the likelihood of persistently higher inflation and interest rates. This is particularly evident in the US, where factors such as substantial budget deficits, immigration restrictions, and increased tariffs on foreign goods make a significant decline in inflation unlikely. We have positioned the fund to offer strong downside protection should the US market's "Goldilocks" scenario – or similar expectations for the IT sector – fail to materialize. However, if consensus predictions of declining inflation, steady economic growth, and robust IT sector profits prove accurate, we anticipate the fund may underperform the broader market but still deliver solid absolute returns over the next 12 months.

Hållbarhet

SKAGENs tillnärmning till hållbarhet

Vår ESG-strategi bygger på fyra pelare. I linje med SKAGENs aktiva investeringsfilosofi utgår vårt hållbarhetsarbete ifrån ett aktivt engagemang i våra portföljbolag, där vi tror att vi kan göra störst skillnad. Den fulla potentialen i en hållbar investeringsstrategi fungerar bäst när följande fyra pelare kombineras.

- ✓ Exkludering
- ✓ Förstärkt screening
- ✓ ESG-faktablad
- ✓ Aktivt ägande

VIKTIG INFORMATION

Historisk avkastning är ingen garanti för framtida avkastning. Framtida avkastning beror bland annat på marknadens utveckling, förvaltarnas skicklighet, fondernas riskprofil och förvaltningsarvoden. Avkastningen kan bli negativ till följd av kursnedgångar. Det finns risker förknippade med investeringar i fonderna på grund av rörelser på aktie-, valuta-, och räntemarknaderna. Även konjunkturen, bransch- och bolagspecifika förhållanden kan påverka avkastningen. På grund av fondernas sammansättning och fondbolagets förvaltningsmetoder, kan fonder med riskklass 6-7 både minska och öka kraftigt i värde. Innan du investerar uppmanas du att läsa faktablad och fondprospekt. En översikt över kostnader i fonderna finns på www.skagenfonder.se/kostnader

En översikt över investerarrättigheter finns tillgänglig på www.skagenfonder.se/om-oss/investerarskydd/

Beslutet att investera i en fond måste ta hänsyn till fondens alla egenskaper. Information om hållbarhet i våra fonder finns på www.skagenfonder.se/hallbarhet/Hallbara-investeringar/

SKAGEN AS är ett värdepappersbolag som förvaltar aktiefonder genom ett avtal med Storebrand Asset Management AS. Storebrand Asset Management AS kan avsluta marknadsföringen av en fond i enlighet med anmälansförfarandet i direktivet för gränsöverskridande distribution av fonder.
